(a) Δgpa/gpa = (β4 + β6 season) Δtothrs
season = 0: pendenza β4 = 0,00130725
season = 1: pendenza β4 + β6 = 0,00328211
la differenza fra le pendenze
è β6 = 0,00197486
100 Δgpa/gpa rispetto a tothrs = 0
